The History of Sexuality, Volume 1: An Introduction by Michel Foucault, is this major French thinker's last work, and since so many others have given a good sense of what the book is about, I will be brief. My only demur to their opinions is that while this may be his most popular book, it is not his best, or his most influential among scholars.

Astronomy is the oldest science, with the first observations of the heavens conducted by our early human ancestors. Historical records of astronomical measurements date back as far as Mesopotamia nearly 5000 years ago, with later observations made by the ancient Chinese, Babylonians, and Greeks. Humans seek to explain their world with (internal) models; one of the earliest is that the affairs of humans and the world are controlled by the positions of the stars and planets.
