Andrew Lo, who is a non-random proponent, with a conclusion that there are many techniques that can be used to beat the major averages, but the question remains for how long can these methodologies be successful. Lo said, "The more creativity you bring to the investment process, the more rewarding it will be.

Random vs. Non-Random Walk Theory in the Financial Markets ...

A Random Walk Down Wall Street, written by Burton Gordon Malkiel, a Princeton economist, is a book on the subject of stock markets which popularized the random walk hypothesis. Malkiel argues that asset prices typically exhibit signs of a random walk and that one cannot consistently outperform market averages. The book is frequently cited by those in favor of the efficient-market hypothesis.
