

Active Learning For Hierarchical Text Classification

Yeah, reviewing a book **active learning for hierarchical text classification** could ensue your close friends listings. This is just one of the solutions for you to be successful. As understood, achievement does not suggest that you have fabulous points.

Comprehending as without difficulty as settlement even more than further will meet the expense of each success. next to, the broadcast as competently as perception of this active learning for hierarchical text classification can be taken as with ease as picked to act.

Between the three major ebook formats—EPUB, MOBI, and PDF—what if you prefer to read in the latter format? While EPUBs

Read PDF Active Learning For Hierarchical Text Classification

and MOBIs have basically taken over, reading PDF ebooks hasn't quite gone out of style yet, and for good reason: universal support across platforms and devices.

Active Learning For Hierarchical Text

active learning in hierarchical text classification. Moreover, we explore how to utilize the hierarchical relation to further improve active learning. Accordingly, several leveraging strategies and heuristics are devised. According to our experiments, active learning under our framework significantly outperforms the

Active Learning for Hierarchical Text Classification

Active learning has been shown to reduce the training examples significantly, but it has not been applied to hierarchical text classification due to several technical challenges. In this paper, we study active learning for hierarchical text classification.

Active Learning for Hierarchical Text Classification ...

Active learning has been shown to reduce the training examples significantly, but it has not been applied to hierarchical text classification due to several technical challenges. In this paper, we study active learning for hierarchical text classification.

CiteSeerX — Active Learning for Hierarchical Text ...

Active learning (AL) is a subfield of machine learning which addresses methods to build models with fewer, but more representative instances. Even though AL has been vastly studied, it has not been thoroughly investigated in hierarchical multi-label classification, a learning task where multiple class labels can be assigned to an instance and these labels are hierarchically structured.

Active learning for hierarchical multi-label classification

Recently, a few works apply active learning methods to

Read PDF Active Learning For Hierarchical Text Classification

hierarchical classification. However, these methods focus on the multi-class case, and regard only leaf nodes as labels in the hierarchical tree. Cheng et al: [2012] embed the label hierarchy and training data into a latent semantic space, and propose an uncertainty strategy based on the se-

Cost-Effective Active Learning for Hierarchical Multi ...

Active Learning, Hierarchical Classification, Label Tree Embedding
1. INTRODUCTION Obtaining labels is an expensive or time-consuming process, especially for large scale multi-class classification problems. Active learning is proposed to make the learning task more efficient [12], by intelligently choosing specific unlabeled

On active learning in hierarchical classification

Flattening a Hierarchical Clustering through Active Learning.

Authors: Claudio Gentile, Fabio Vitale, Anand Rajagopalan.

Read PDF Active Learning For Hierarchical Text Classification

(Submitted on 22 Jun 2019) Abstract: We investigate active learning by pairwise similarity over the leaves of trees originating from hierarchical clustering procedures. In the realizable setting, we provide a full characterization of the number of queries needed to achieve perfect reconstruction of the tree cut.

Flattening a Hierarchical Clustering through Active Learning

Hierarchical Sampling for Active Learning class labels. We describe an active learning strategy with good statistical properties, that will discover and exploit any informative pruning of the cluster tree. For instance, suppose it is possible to prune the cluster tree to m leaves (m unknown) that are fairly pure in the labels of their constituent points.

Hierarchical Sampling for Active Learning

Read PDF Active Learning For Hierarchical Text Classification

Request PDF | On active learning in hierarchical classification | Most of the existing active learning algorithms assume all the category labels as independent or consider them in a "flat" structure.

On active learning in hierarchical classification ...

An (agglomerative) Hierarchical Clustering (HC) procedure is an unsupervised learning method parametrized by a similarity function over the items to be clustered and a linkage function that lifts similarity from items to clusters of items.

Flattening a Hierarchical Clustering through Active Learning

Based on the analyses of the questions listed above recommendations are made for the use of active learning in text classification. Ancillary issues such as computational efficiency are also considered. The structure of this paper is as follows.

Classification

title = "On active learning in hierarchical classification", abstract = "Most of the existing active learning algorithms assume all the category labels as independent or consider them in a flat structure. However, in reality, there are many applications in which the set of possible labels are often organized in a hierarchical structure.

On active learning in hierarchical classification ...

Labeling text data is quite time-consuming but essential for automatic text classification. Especially, manually creating multiple labels for each document may become impractical when a very large amount of data is needed for training multi-label text classifiers. To minimize the human-labeling efforts, we propose a novel multi-label active learning approach which can reduce the required [...]
