The year and month you reach full retirement age depends on the year you were born. You can find your full retirement age by choosing your birth year in the calculator below, or by using our retirement age chart. If your birthday is January 1st of any year, enter the previous year because that is how we determine your full retirement age.

Benefits Planner: Retirement | Retirement Age Calculator | SSA

Use the formula $C2/B2$ in column D to calculate the what percentage of the number in column B is represented by the number in column C. For example, if column A specifies your product, column B might represent the total produced and column C might be the total shipped. If B is 75 and C is 69, enter $C2/B2$ in column D to get 92%.
