Camera Setup. Connect the camera and the NVR to the separate switch. Assuming the switch is already connected to the router and the NVR is already setup with an address on the same network as the router, we can setup the camera. Using the IP portal tool, find the LTS IP camera, select the device and activate the camera with a password of your choosing.

(Integration) - Connect LTS Platinum IP Camera on LTS ...

To access the Axis IP camera (or other devices), you must set the password for the default administrator user root. This is done in the Configure Root Password dialog, which opens when the product is accessed for the first time. In other words, the new Axis cameras don't have a default password, you need to create one.
