Note that associative arrays were known as PL/SQL tables in Oracle 7, and index-by tables in Oracle 8 and 8i. Their names were changed to associative arrays in Oracle 9i release 1. An associative array can be indexed by numbers or characters. Declaring an associative array is a two-step process. First, you declare an associative array type.

name of the index by tables into associative arrays, as they were more like an array in structure and also allowed them to be indexed by either PLS_INTEGER, BINARY_INTEGER or VARCHAR2 data types. By allowing us to index by string, the associative arrays are far more flexible than the other two types with more real-time use in our applications.
