### **The Vertical Farm | Dr. Dickson Despommier | Macmillan**

But anyway, vertical farming refers to the practice of producing fruits and vegetables vertically, in stacked layers, perhaps on many floors inside a building, using artificial lights instead of the sun, and a whole range of relatively new technologies. The two main reasons why it's a much-discussed topic now is because:

A farm atop a former factory in The Hague produces vegetables and fish in a self-sustaining loop: Fish waste fertilizes plants, which filter the water for the fish. Local restaurants proudly offer ...

### **How the Netherlands Feeds the World - Magazine**

Vertical farming, a term coined by Dickson Despommier, is the practice of producing food in vertically-stacked layers. These "farms" make use of enclosed structures like warehouses and shipping containers to provide a controlled environment to grow crops in a hydroponic or aeroponic system.

### **Feeding the Future of Agriculture with Vertical Farming**

No, Vertical Farms Won't Feed the World While they are well-intentioned, new indoor "farms" won't help feed the world or reduce the environmental impacts of agriculture. We would be better to focus our efforts elsewhere.

### **No, Vertical Farms Won't Feed the World - Dr. Jonathan Foley**

thing the vertical Farm does is mediate the visibility of the production of food. The Vertical Farm helps you realize that your engagement with the world, particularly in terms of what you eat, has consequences. As you approach the Vertical Farm from a distance, you witness transparent shelves of color and texture cantilevered off the structural

### **ctbuh.org/papers**

Vertical farming is the practice of growing crops in vertically stacked layers. It often incorporates controlled-environment agriculture, which aims to optimize plant growth, and soilless farming techniques such as hydroponics, aquaponics, and aeroponics.

### **Vertical farming - Wikipedia**

Most vertical farms are either hydroponic, where veggies are grown in a basin of water containing nutrients, or aeroponics, where the plants' roots are sprayed with a mist that includes water and the nutrients required to help the plants grow. Neither require soil for the crops to grow.
