About | Typeset In The Future. Typography and font choice are often used to create a sense of futurism in movies. Indeed, it's got to the point where you can set your calendar to FUTURE simply from the presence of Eurostile Bold Extended on the wall of a passing spaceship. This site is dedicated to typography and iconography as it appears....

About | Typeset In The Future

Welcome to Typeset In The Future: The Alien Edition. The opening credits for Alien are nothing short of a typographic masterpiece. You can watch them in their entirety on the Art Of The Title web site, but here's the general gist: a slow, progressive disclosure of a disjointed, customized Futura reveals the movie's central theme over 90 seconds of beautifully-spaced angular lettering.

Star Trek: The Motion Picture, a movie adaptation of the cult sixties TV show, very nearly didn't get made. If it weren't for the runaway success of Star Wars and Close Encounters of the Third Kind (both released in 1977), fickle Paramount executives would have canceled their faltering TV project Star Trek: Phase II, instead of adapting it into a big-screen production.

Eurostile, its precursor Microgramma, and their close equivalent Bank Gothic, are sans-serif fonts used in many Science Fiction films to give a futuristic feel. In fact, they have been used so often that the presence of these fonts in the credits or set design now actually helps viewers to quickly understand the setting of the scene.
