Urban Design | Taylor & Francis Group

In urban planning and architecture, typology is the taxonomic classification of (usually physical) characteristics commonly found in buildings and urban places, according to their association with different categories, such as intensity of development (from natural or rural to highly urban), degrees of formality, and school of thought (for example, modernist or traditional). Individual characteristics form patterns.

Typology is a familiar concept in the field of urban design – different typologies of space, behaviours, processes and products are present within the literature (Lang, 2005; Krieger and Saunders, 2009). Yet the word ‘typology’ is ambiguous.

A typology of Urban Design theories and its application to ...

Urban Design is the process of creating the public realm through the artful arrangement of buildings and site elements as cities grow and change. The public realm includes publicly-owned streets and rights of way, pathways, parks, plazas, publicly-accessible open spaces, and public and civic buildings.

Every city must identify the range of street typologies it encompasses. To ensure that new street designs are suitable for the given context, existing streets must be documented and analyzed as part of the comprehensive public space network. Evaluate each street project to balance the needs of different transportation modes within the given context and culture.

Street Typologies | Global Designing Cities Initiative

A movement of urban theorists and practitioners in the US, New Urbanism, has identified building typology as a key to defining more user-friendly places. In trying to preserve neighborhoods or building new ones, building types once again become the building blocks of the city, and may be codified in law as form-based codes .

Building typology - Wikipedia

This typology has a large urban scale and large floor plans which can be at odds in terms of form, scale and layout to the surrounding urban form. If the form is coherent then it can form a...

Urban Design Typology Analysis. Objectives: – Describe Richmond’s urban development pattern – Categorize Richmond based on urban form (rather than zoning or land use) Full report available at: www.richmond300.com

URBAN DESIGN TYPOLOGIES - City of Richmond, Virginia

We also examined how payment and benefit design can be blended to improve health care delivery. In this report, we develop a new typology of benefit designs under two categories— cost sharing and contingent coverage —and focus only on designs that have the potential to change consumer behavior and its alignment with payment reform.

A Typology of Benefit Designs | Urban Institute

We also examined how payment and benefit design can be blended to improve health care delivery. In this report, we develop and propose a payment typology that centers on the incentives inherent in payment methods rather than a classification based on the type of provider receiving the payment.

A Typology of Payment Methods | Urban Institute

Development of a working typology of urban space can provide a way of analyzing exist- ing and designing new forms, as well as a tool for teaching urban design, planning and architecture. Typology is the study of elements that cannot be further reduced.
