Wolves live in family groups called packs. A pack is usually made up of a male parent, a female parent and their pups from the last few years. Usually, four to six pups are born together in a litter. The pups in a litter are called litter mates. Their first home is usually a den, which can be a small cave or a hole dug in the ground.

Wolf Families | International Wolf Center

Wolves are members of the Canidae family, which includes dogs, foxes, coyotes and jackals. Members of this taxonomic family, called canids, date back to the Oligocene and Miocene eras, making them one of the oldest groups of carnivores still in existence.

Animals That Are a Part of the Wolf Family | Animals - mom.me

Wolves (Canis Lupus), are related to dogs, or more rightly, dogs are actually related to wolves. Wolves and dogs are quite similar in many ways, however, in most cases, wolves are larger animals. Wolves generally have longer legs than dogs. It is difficult to imagine, however, everything from a pug dog to a doberman comes from the wolf.

Wolves - Facts, Diet & Habitat Information - Animal Corner

Wolf Families Wolves are very social animals. They live and hunt together in groups called packs. A wolf pack is really just another name for a family of wolves.

All About Wolves - Wolf Families - Scholastic

The wolf is the largest member of the Canidae family, and is further distinguished from coyotes and jackals by a broader snout, shorter ears, a shorter torso and a longer tail. It is slender and powerfully built with a large, deeply descending rib cage, a sloping back, and a heavily muscled neck.

Wolf - Wikipedia

Canidae (/ˈkænɪdiː/; from Latin, canis, "dog") is a biological family of dog-like carnivorans. A member of this family is called a canid. There are three subfamilies found within the canid family, which are the extinct Borophaginae and Hesperocyoninae, and the extant Caninae. The Caninae are known as canines, which includes domestic dogs, wolves, foxes and other extant and extinct ...
